

COMP3851 – Computer & IS Work Integrated Learning Part A
Minutes of Meeting
Week 3 – Meeting 1: Sprint 3 Task Planning and Research Review

Team: 1

Place: PSB Academy Date/Time: 8/6/2026 830-1230PM

In attendance

Kaung Sett Paing Tun – C3546060

Alas Elizabeth Louise Flores - C3546059

Berezovik Daniil – C3543315

Krish Longwani – C3549511

Hein Myat Thu – C3552370

Apologies

Agenda

- Review current Sprint 3 tasks on the Notion Scrum/Kanban board
- Discuss completed AI competitor matrix tasks
- Review current literature review tasks
- Confirm remaining research work for peer matching and study AI recommendation
- Update task status and responsibilities
- Confirm next steps for research and documentation

Key Points Discussed

The team reviewed the Notion Scrum/Kanban board and checked the current Sprint 3 task progress. The board showed that the AI competitor matrix tasks for Krish, Elizabeth, and Daniil had been moved to Done.

The team also discussed the remaining literature review tasks. Paing is currently working on the literature review for matchmaking, while Hein is assigned to the literature review for study AI recommendation.

The team confirmed that the current focus is to support the project's feature justifications with research. This includes finding literature related to AI-assisted collaboration, peer

matching, study recommendation, student over-reliance on AI, and collaborative learning experiences using AI.

The team also discussed the need to continue updating project documents based on research findings, sponsor feedback, and Sprint 3 progress.

Action sheet

Task	Responsible	Due	Notes / Expected Output
Complete AI competitor matrix report	Krish	Completed	Competitor matrix task completed and moved to Done
Complete AI competitor matrix report	Elizabeth	Completed	Competitor matrix task completed and moved to Done
Complete AI competitor matrix report	Daniil	Completed	Competitor matrix task completed and moved to Done
Continue literature review for matchmaking	Paing	Ongoing	Research should support the peer matching feature
Continue literature review for study AI recommendation	Hein	Ongoing	Research should support AI-based study recommendations
Update Notion Scrum/Kanban board	All members	Ongoing	Keep task status updated under Done, In Progress, and To Do
Continue feature-based research	All members	Ongoing	Research should support planned SPC features and project direction
Continue polishing project documents	Elizabeth / All members	Ongoing	Update documents based on completed research and sponsor feedback

Table 1: Action Sheet for Week 3 Meeting 1

Decisions / Confirmations

Item	Decision / Confirmation
Sprint 3 progress	AI competitor matrix tasks for Krish, Elizabeth, and Daniil are completed

Literature review	Paing and Hein will continue their assigned literature review tasks
Research focus	Research should support SPC features such as peer matching and AI study recommendation
Notion board	The team will continue using Notion to track Sprint 3 progress
Documentation	Project documents will continue to be updated based on research findings

Table 2: Decisions and Confirmations for Week 3 Meeting 1

Next Meeting Focus

- Review Paing's literature review for matchmaking
- Review Hein's literature review for study AI recommendation
- Check updated Notion Scrum/Kanban board
- Continue refining project documents
- Discuss next tasks after Sprint 3 research work is completed
